

In Massachusetts we've reduced the annual dropout number by over 3,700 students compared to 5 years ago. And we've increased the number of students graduating by nearly 4% points over the last 5 years. That's big news!

How are we doing it? Mark your calendar and join us for this special one-day event spotlighting dropout prevention and graduation-boosting strategies from districts around the state!

A smorgasbord of strategies to learn about - from grade 8/9 transition approaches, alternative pathways, graduation coaches, credit recovery, community partnerships, dropout re-engagement (and much more!) to lessons from district leaders about how to move dropout prevention and re-engagement into the heart of "how we do school." Districts small, medium, and large making big progress will be there so don't miss this unique opportunity!
